# How to prepare the micro SD card to support the tour function on a MK5 45/55X Receiver

1. Format the SD card in Windows by right clicking on Disk Icon

2. Select "Format". Must be "FAT" not "FAT 32". "Volume label" must be blank.

3. Copy file ee.dat file to the microSD card then copy the tour.55x to the microSD card.

These files can be found on the BBV Support server [www.support.bbvccctv.com/software\\_and\\_utils/upgrade\\_software](http://www.support.bbvccctv.com/software_and_utils/upgrade_software)

These will be a zip files you will need to unzip the files onto your desktop before you copy them onto the SD card.

**Loading an EMPTY ee.dat file to an RX55x will delete all previously configured data.**

4. If wrong file is copied or copy fails the card must be re-formatted. **DO NOT** deletes a file and the copy new file. The SD card must contain an ee.dat file with no files deleted then you can copy the tour.55x file.

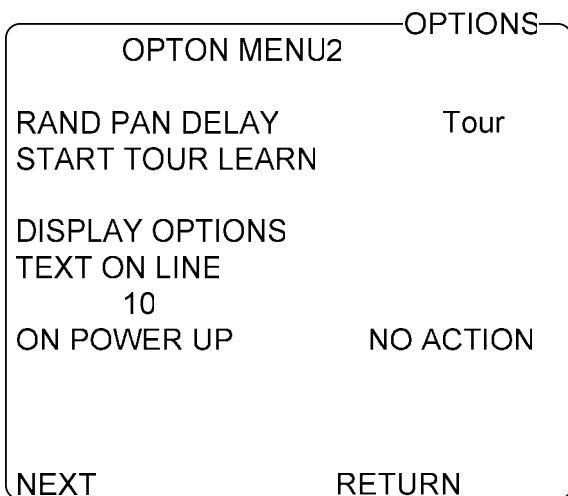

5. Refer to Installation Manual to program. Select "LOAD DATA FROM SDCARD" to restore a configuration or select "SAVE DATA TO SDCARD" save a previous configuration.

6. Now the Micro SD card is ready to use & needs to be installed into the receiver.

7. From this point on there are a number of assumptions made:

- i, the camera & lens is back focused
- ii, the camera has passed a self test (and passed)
- iii, the end stops are set up

8. Now go into the menu of the receiver and navigate to the OPTION page of the menu then to the OPTION MENU2. This is where you can select the tour option & start the recording of the tour. When on OPTION MENU2 you will need to change RAND PAN DELAY to "Tour" this will then show the next line that shows "START TOUR LEARN".

Random pan delay, 1=fast, 10=slow, or Tour for user defined Tour

Goto DISPLAY OPTIONS submenu.  
Position of status line on screen, 1=top, 10=bottom  
Select goto PRESET 1/RANDOM PAN/PATROL 1/NO ACTION

BACK to OPTIONS menu 1, or RETURN to MAIN menu

9. When you can see the "START TOUR LEARN" text on the screen use the joystick to navigate down to it and when it is flashing press "IRIS OPEN" and the menu will leave the screen and you will see a bar at the bottom of the screen. This shows the 2 options "Preset 1 to start or Preset 2 to end."

Select "go to preset 1 will start the recording."

Then you will see the progress bar at the bottom of the screen. As you do PTZ & Focus functions you will see the amount memory being used on the task bar.

When the required Tour has been saved then Select "go to preset 2 will stop the recording."

Select "go to preset 99 or a AUTOPAN" command and this will start the Tour

## Extend your BBV Warranty from 12 months to 3 years

As of the 1<sup>st</sup> September 2008 BBV have offered our customers the opportunity to extend the standard 12 month warranty to 3 years.

You must register for the extended warranty within 12 months of the date of manufacture.

### How to register for the 3 year warranty

Registering for the new, longer 3 year warranty term is quick and easy.

Either:

Complete the warranty application card that comes in the box with your BBV product, and return it FREEPOST to BBV:

### BBV 3 Year Warranty

If this card is returned with the serial number of the product and the installation company details BBV will extend the warranty period from 12 Months to 36 Months.

Number of Units,  Start Serial No.  Final Serial No.
